Alaska has five large marine ecosystems, or ecosystem complexes, each with unique characteristics. The Gulf of Alaska and the Bering Sea are especially resource-rich and support some of the largest and most valuable commercial fisheries in the world, like Alaska pollock, red king crab, and sablefish.

Alaska Fisheries Science Center | NOAA Fisheries

Fishery observers and at-sea monitors collect data from U.S. commercial fishing and processing vessels as well as from shore-side processing plants. Observers are professionally trained biological scientists gathering first-hand data on what's caught and thrown back, which supports science, conservation, and management activities. The high-quality data they collect are used to monitor ...
