Building services are systems installed in buildings to make them comfortable, functional, efficient and safe. They can be controlled by simple mechanisms such as manual switching, clocks or detectors such as thermostats or motion detectors, or they can be controlled by more complex building management systems (BMS).

Building management systems BMS - Designing Buildings Wiki

Design management is the business side of design, which aims to create the right environment to control and support a culture of creativity and innovation, and to embrace the iterative nature of design involving the many disciplines that, collectively, will deliver design solutions - and all at the same time as ensuring that an organisation's commercial goals and objectives are achieved and that all is done in an ethically sound way.
