The standard required obstacle clearance (ROC) of 48 feet per NM to clear these obstacles would require a climb gradient greater than 200 feet per NM for a very short distance, only until the aircraft was 200 feet above the DER

**Departure Procedures (DPS) - CFI Notebook**

"Cleared to (destination) airport as filed" does NOT include the en route altitude filed in a flight plan. An en route altitude will be stated in the clearance or the pilot will be advised to expect an assigned or filed altitude within a given time frame or at a certain point after departure.

**Aeronautical Information Manual - AIM - Departure Procedures**

The USA can now tell you to climb or descend, in which case you do so without restriction, but if it's a 'climb via the SID' then you must comply. The UK & Japan are more simple in that unless you're specifically told to comply with the restrictions then ATC's instructions overrule the SID/STAR and you can ignore the hold downs/ups.
