September 2016. What is giardiasis?
Giardiasis is an intestinal (bowel) illness caused by a microscopic parasite called Giardia lamblia. It is a common illness that causes diarrhea (loose stool/poop). Over 2,000 cases occur in New York State each year. Who gets giardiasis?

Giardiasis (beaver fever) Fact Sheet

Read Free If Beaver Had A Fever

Giardiasis, popularly known as beaver fever, is a parasitic disease caused by *Giardia duodenalis* (also known as *G. lamblia* and *G. intestinalis*). About 10% of those infected have no symptoms. When symptoms occur they may include diarrhea, abdominal pain, and weight loss. Vomiting, blood in the stool, and fever are less common. Symptoms
