Nikon Auto Focus Manual

For best results, follow these manual-focusing steps: Adjust the viewfinder to your eyesight. Set the focus switch on the lens to M. This step assumes that you're using a lens like the Nikon DSLR kit lens.

How to Focus a Nikon DSLR Manually - dummies

When an AF-P lens (O Compatible Lenses) is used in manual focus mode, the in-focus indicator will flash in the viewfinder (or in live view, the focus point will flash in the monitor) to warn that continuing to rotate the focus ring in the current direction will not bring the subject into focus.

Manual Focus

If the lens supports M/A (autofocus with manual override) or A/M (autofocus with manual override/AF priority), manual focus can also be selected by setting the camera focus mode to MF (manual focus; 0 Focus Mode). Focus can then be adjusted manually, regardless of the mode selected with the lens.

Focus

The Nikon Df is unique among digital SLRs in that not only can it meter with manual focus AI Nikkors, but also with older non-AI Nikkors! It does this by using a folding meter coupling lever which can be moved out of the way when mounting non-AI lenses - something that would damage a non-folding lever.
