### Nikon Automatic 17 A Flash

Note: Nikon has designed a new, very useful little device called AS-17 Flash Coupler, which enable ALL TTL flash (Including the current AF models) with a standard ISO accessory shoe (Like the SB-15 featured here) to be used on the F3 models (except those which use the ISO-type accessory shoe on DE-5 finder) and retaining TTL flash exposure control.

### Nikon SB-15/17 - Instruction Manual

A feature available in some flash units that fires the flash many times while the shutter is open, during a brief exposure, producing a strobe-light effect. In this mode, the photographer can control the flash output, number of times the flash fires, and how often the flash fires.

### Speedlight Camera Flashes | Nikon

Set the flash to the Automatic mode. If your flash has a zoom head, set it to the focal length to be used. Otherwise, skip this step. Note that the focal length scale of most flashes are for 35mm cameras. Therefore, you have to convert the focal length used on a 995 to its 35mm equivalent. Check here to learn more.

### Using External Flashes in the Automatic (A) Mode

Nikon recommend using Nikon branded Speedlights with Nikon digital cameras and does not undertake testing of flash units and accessories from other manufacturers. Nikon cameras comply with ISO10330 which is a international standard for cameras when used with flash units, failure to comply with this standard could cause damage to your camera and may void your Nikon warranty.

### Nikon Speedlight Compatibility Chart

The older Nikon SC-17 cable still works fine on newer cameras and flash units, and it is plentiful and inexpensive on Ebay. This older SC-17 is the same cable as the newer Nikon SC-28 Hot Shoe Remote Cord except it just does not have the pin hole for the hot shoe lock of the new flashes (which the new SC-28 does have).

### How to trigger speedlights Off camera

Another flash, a slave, is mounted on the SU-4 unit, which, in turn, can be mounted on a tripod. For a Coolpix camera, the internal flash is the master. If the internal flash is turned off and an external flash is attached to SC-17 and/or AS-E900 adapter, the external flash is the master. Note that multiple SU-4 units can be used.
