Atomic Wall Clock - Walmart.com

The first atomic clock that tracked the passage of time accurately, was built in 1955 by Jack Parry and Louis Essen. The concept of measuring time by atomic transition was first proposed in 1879 by Lord Kelvin, but the technology wasn't yet on par with philosophy. It wasn't until over 50 years later when magnetic resonance was developed by Isidor Rabi, that an actual method for doing this emerged.

The best spot for an atomic wall clock is near a window, preferably facing Colorado. If possible, position it at least six feet away from household electrical appliances, such as TVs, computers and air conditioners. The WWVB signal is strong enough to get through most residential buildings and steel buildings with plenty of windows.

How To Set An Atomic Wall Clock | Hunker

The Timex Intelli-Time Clock is perfect for any home, office or classroom. The extra large 13.5" LCD screen features bold, easy to read numbers. Intelli-Time technology sets itself to the correct time and date, and automatically adjusts itself for Daylight Saving Time.
